## Php html page to image

How to insert an image: Try it Yourself » More "Try it Yourself" examples below. Definition and Usage The tag is used to embed an image in an HTML page. Images are not technically inserted into a web page; images are linked to web pages. The tag creates a holding space for the referenced image. The tag has two required attributes: src - Specifies the path to the image alt - Specifies an alternate text for the image, if the image for some reason cannot be displayed Note: Also, always specify the width and height of an image. If width and height are not specified, the page might flicker while the image loads. Tip: To link an image to another document, simply nest the tag inside an tag (see example below).
